

Boulevard C o s m o s

AI HR CONSULTING COMPANY

Harmonizing a System with the Talents

BUSINESS OVERVIEW

We Provide SMEs Enterprise with a unified HR Intelligence Platform that has AI-powered system and Consultancy Services

It combines scalable software revenue with high-touch consulting services to land enterprise clients to maximize Business Value, and Lower Client Acquisition Costs

One Stop HR Solution

1. Native AI SaaS platform
2. Employee-facing ChatBot
3. Fractional CHRO advisory
4. End-to-end HR domain coverage

Target The Underserved

SMEs with minimum/without HR structure

Supported Grants

PSG makes our services more affordable to our target clients (SMEs)

PILLARS	FOCUS	KEY DELIVERABLES	REVENUE MODEL
SaaS App	Workforce automation & predictive analytics	Employee retention risk modeling, Performance growth workflow stages analysis	Recurring subscription (Billed /month)
Consultancy	Organizational change & compliance	AI integration strategy, custom HR framework design, change management, labor law compliance	High-margin retainers & project fees

Our Vision

To empower every enterprise with the definitive AI infrastructure to turn human intelligence into their greatest competitive advantage

Our Mission

We transform enterprise-grade HR advisory into intuitive AI applications that simplify workforce complexity. By delivering real-time, automated insights, we empower leaders to elevate employee experiences and drive measurable growth

Business Model

- **Transformation:** AI (APP) (Product) HR Consultancy Model (Service)
- **Benefits:** SMEs growth stage company
- **Target Market Geography:** Singapore/SEA - Startups (SMEs)
- **Value Add:** Consultative one-on-one services
- **Revenue Stream:** Direct Sale, Indirect Sale (Channel Partners/Marketing Lead Generation)
- **Key Resources:** Experienced HR Consultants and AI Engineers,, Modern Production Tools/ User Friendly System

OUR TEAM

Venenza Subramaniam

FOUNDER & CEO

PROFESSIONAL PROFILE

Accomplished Global HR Leader and People & Culture Strategist with 25+ years of experience across APAC, Americas, and Europe. Aligns people strategy with business goals in complex, multi-country and highly regulated environments.

BACKGROUND AND EXPERIENCE

Has led regional and global HR functions, partnering with C-level leaders on talent acquisition, performance management, compensation and benefits, learning and development, employee relations, and change management.

Experienced in building HR functions, policies, and processes from the ground up and supporting M&A, culture, and organization design initiatives across multiple markets. Recognized multiple times for driving impactful HR programs that improve retention, engagement, and operational effectiveness.

STRATEGIC AND VALUE IMPACT

- Advises C-suite and senior leaders on end-to-end HR strategy so performance, career paths, and people data clearly support business and M&A objectives.
- Designs and implements HR roadmaps, policies, and SOPs across the employee lifecycle (onboarding, probation, confirmation, offboarding) to create structured, compliant, and scalable HR operations.

AREAS OF EXPERTISE

- Strategic HR & People Advisory
- Talent Acquisition & Workforce Planning
- Performance Management & Compensation
- Employee Relations & Engagement
- HR Policies, Compliance & Governance

STAR AI HR APP

The STAR of the Modern HR AI Transformation

An AI-powered HR platform that combines HR consulting, 11 core HR domains, employee self-service, and intelligent workflows in one accessible solution.

WHY IT STANDS OUT

ACCESSIBLE • FUNCTIONAL • EFFICIENT

11 CORE HR DOMAINS

Comprehensive HR coverage in one platform.

HR CONSULTING

SMEs have access to professional HR consultancy when required—for guidance, complex situations, and critical HR decisions.

AI AI-POWERED 24/7 ASSISTANT

Employees can ask questions anytime with AI providing broader and more flexible answers than a traditional programmed chatbot.

ACT AI TAKES ACTION

Go beyond answers—AI understands your request and takes action for you, such as submitting leave applications on your behalf.

SUM UP SUMMARIZE MULTIPLE SOURCES

AI reads and understands information from multiple sources in one place and explains it in a clear, human-friendly way.

SECURE GOVERNED AI. ENTERPRISE CONTROL.

Backend-enforced authorization and secure workflows keep AI powerful, controlled, and compliant.

Star

MEET

Garry

Your AI Companion in Star

Garry is your trusted AI companion inside Star. He understands your questions, connects the right information, and helps you get things done—accurately and securely.

AI that understands. Support that delivers.

Garry combines the power of AI with your HR data, policies, and systems to support you every day.

Ask

Ask anything in plain language.
Garry understands and replies.

Connect

Connects HR data, policies, contracts, and systems securely.

Act

Prepares tasks and actions with the right approvals.

Trusted. Governed. Secure.

Garry operates within permissions, company rules, and approval workflows.

◆ Ask Garry. Get clarity. Get things done. ◆

One question. Many sources. One grounded answer.

DETERMINISTIC CONTROLS

permissions • scope • rules • validation • filters

AI interprets. Backend governs.

Secure by design. Governed by default.

AI INTELLIGENCE

understanding • planning • retrieval • composition

Right tenant

Right employee

Active documents

From Intent to Action. Always Governed.

AI can prepare an action. Only the governed system can change state.

One governed action model. Many HR workflows.

Backend-enforced at every step

AI proposes. You approve. Star executes.

What Garry Can Do Today

One conversational interface across the HR capabilities available in Star.

Capabilities available today

01

Knowledge & Documents

- Policy Q&A with citations
- Employment contract lookup
- Active document context

Always accurate.
Always relevant.

02

Time & Requests

- Check balances & eligibility
- Prepare and submit requests
- Manager approval actions

Faster requests.
Smarter approvals.

03

Performance

- Goal & review drafting
- Manager feedback support
- Approval & acknowledgement

Better conversations.
Better outcomes.

04

Actions & Notifications

- Pending actions in chat
- Confirmation cards
- Workflow reminders & updates

Nothing missed.
Always in the loop.

Built on trust. Designed for enterprise.

Secure by design

Enterprise-grade security
at every layer.

Trusted by default

Role-based access with
least-privilege controls.

Audit ready

Complete audit trails
and activity logs.

Governed & compliant

Policies and data rules
built in and always on.

♦ All capabilities inherit the same identity, permissions, confirmation and audit controls—across every conversation.

One Star. One experience.

Every AI Interaction Leaves a Trace

See how Garry understood, planned, acted and responded—end to end.

NOTHING HAPPENS INVISIBLY

Star gives operators a privacy-aware view into every AI operation.

Follow the reasoning path without turning employee conversations into an admin reading pane.

TRACEABLE

End-to-end interaction history

INSPECTABLE

Decisions, tools and outcomes

AI OPS · INTERACTION TRACE

• COMPLETED

One interaction. One trace. Full visibility.

New capabilities. Same governed foundation. →

MARKET RESEARCH

Market Dynamics (2023–2025)

How regulatory shifts, labor policies, and AI mandates transformed
Singapore's HR ecosystem into a high-demand market for hybrid
advisory SaaS.

The 3-Year Market Evolution (2023–2025)

2023

COMPASS Framework

- MOM launched points-based Employment Pass system in Sept 2023.
- SMEs struggled with salary percentiles and diversity quotas.
- Spurred massive demand for localized compliance consulting.

2024

FWA Guidelines & Admin Overload

- Tripartite Guidelines on Flexible Work Arrangements announced.
- HR teams overwhelmed with formal leave & working requests.
- 30–40% of internal HR hours lost to repetitive contract queries.

2025

National AI 2.0 & Efficiency

- National AI Strategy 2.0 incentivized adoption of enterprise GenAI.
- Rising headcount costs forced SMEs to automate routine tasks.
- Conversational natural-language interfaces replaced static HR portals.

Calculated Market Sizing (**SAM / SOM**)

SINGAPORE ADDRESSABLE MARKET • SINGAPORE SMEs

\$S\$148M

Targetable Singapore SME Segment

Calculated from ~25,000 mid-sized SMEs (10–200 staff) out of 369,500 total enterprises, spending ~\$S\$6,000/yr on HR advisory & tools.

Realistic Market Penetration for Boulevard Cosmos

SERVICEABLE OBTAINABLE MARKET • 3-YEAR TARGET

\$S\$3.6M

ARR Goal (Year 2–3)

Capturing 300 active SME clients (~1.2% SAM share) at \$S\$1,000/month (\$S\$12k ARR) for hybrid Consulting + AI Chatbot platform.

The SME Core Problem: **The Double Bottleneck**

Problem 1: High Advisory Costs

Local labor compliance is complex and constantly changing.

Singapore SMEs cannot afford traditional legal or consultancy retainers (\$3,000–\$5,000/month) just to stay compliant with local employment laws, MOM updates, and COMPASS quota scoring. Not all HR have experience at a CHRO level.

Problem 2: Administrative Drain

HR teams spend 30–40% of their day answering repetitive queries.

Employees waste time navigating complex portals or emailing HR for basic tasks—such as leave entitlement checks, contract clarifications, or childcare leave policies.

Competitive Landscape & Market Positioning

Category	Examples	Key Limitations	Our Hybrid Advantage
Traditional HR Advisory	Boutique HR firms, Legal Advisors	Expensive retainers, manual responses, non-scalable labor model.	Scalable AI engine answers 80% of routine policy queries instantly.
Global HRIS Software	Workday, BambooHR, Employment Hero	Static databases; lacks contextual intelligence on local Singapore MOM laws.	Pre-configured with MOM compliance rules, COMPASS, and local EA nuances.
Generic Enterprise AI	Custom GPTs, Off-the-shelf bots	High risk of "hallucinations" on legal clauses; no direct HRIS API action.	RAG model locked to uploaded contracts + API execution for leave filing.
Our Hybrid Solution	HR Consulting + AI Chatbot SaaS	None (Combines trusted human consulting with 24/7 AI chatbot execution).	High-margin recurring SaaS + trusted strategic consulting retainer.

RAG: Retrieval-Augmented Generation

Source: Internal Industry Analysis & Singapore HR Software Market Benchmarks (2025).

Why Our **Hybrid Model Wins**

1. Expert Advisory

Establishes foundational trust by drafting MOM-compliant contracts, FWA policies, and workforce strategy tailored to Singapore regulations.

2. Natural Language AI

Employees check leave balances, submit leave requests, and ask contract questions in plain English.

3. RAG + API Execution

Retrieval-Augmented Generation ensures minimal hallucination on contract terms.

TRADITIONAL HR VS OUR HR

Traditional HR vs. Our Consultancy vs. Our AI HR App

Traditional HR forces SMEs to choose between affordable and capable. Our firm is the only solution that combines strategic expertise, AI automation, and human leadership — all in one.

Traditional HR

In-house or manual

What it is

A company hires a full-time HR person or handles HR themselves — manually, reactively, and admin-heavy.

Who handles HR

Owner, admin staff, or a hired HR executive

Cost

\$50K–\$100K+/yr (salary + CPF + benefits)

Availability

Office hours only

Strategic depth

Depends on hire quality — most SMEs can't afford a CHRO

Technology

Spreadsheets, email, WhatsApp, PDFs

Our HR Consultancy

Fractional expert advisory

We bring senior HR expertise on a retainer basis — strategy, compliance, and people leadership without the full-time hire.

Our HR consultants
+ fractional CHRO

Retainer-based — fraction of a full-time hire

During agreed retainer hours

CHRO-level thinking on demand

Our frameworks, tools + ChatBox platform

Our AI HR App

ChatBox — always on

ChatBox is our AI-powered platform on iOS & Android — handling day-to-day HR operations automatically, 24/7.

AI system — employees
self-serve via ChatBox

Per-employee/month
SaaS subscription

24/7 — on any device, any time

Not for strategy — built for speed + access

Native AI SaaS, iOS & Android app

Our firm is the only solution that brings all three together — strategic consultancy + AI automation + ChatBox — at a price SMEs can actually afford.

Traditional HR — Pros & Cons

In-house HR or owner-managed HR · the conventional approach most SMEs start with

What it is:

A company hires a full-time HR person, outsources to a generic HR admin service, or manages HR manually themselves — spreadsheets, email chains, WhatsApp groups and PDF handbooks.

✓ Pros

- ✓ **Full-time presence**
An in-house HR person is always there — they know the company culture, the people, and the history deeply.
- ✓ **Company-specific knowledge**
Builds deep familiarity with the business over time — relationships, org dynamics, brand values.
- ✓ **Immediate availability (in theory)**
For larger companies, having HR on-site means issues get handled in person quickly.
- ✓ **Full control**
The business retains direct control over all HR processes, decisions and data in-house.
- ✓ **Employee comfort**
Some employees feel more comfortable raising issues face-to-face with an internal person they know personally.

✗ Cons

- ✗ **Expensive for SMEs**
A qualified HR executive costs \$50K–\$100K+ per year in salary alone — before CPF, benefits and software.
- ✗ **HR data scattered everywhere**
Policies in PDFs, records in spreadsheets, approvals on WhatsApp — no single source of truth.
- ✗ **Reactive, not proactive**
Issues are dealt with after they happen. MOM and PDPA changes are often missed until a problem occurs.
- ✗ **Limited strategic depth**
Most SMEs can't afford a CHRO-level hire. Generic HR admins handle tasks but lack strategic thinking.
- ✗ **No 24/7 access for employees**
Employees can only get HR answers during office hours — leave balances, policy questions and onboarding all wait.

Verdict: Works for large companies with budget. For SMEs under 150 staff, it is too expensive, too reactive, and too disconnected to be effective.

Overall Analysis & Key Finding

COMPARISON

The comparison reveals three different approaches to addressing SME HR needs. Traditional HR offers the strongest personal and company-specific support, but the estimated S\$85K–S\$135K+ annual HR-related cost makes it a heavier model for SMEs. Consultancy reduces the need for a full-time senior HR function through CHRO-level strategic expertise, while the AI HR App addresses routine HR needs through 24/7 access, automation, and employee self-service.

TRADITIONAL HR

Human presence

Higher cost
Headcount dependent

HR CONSULTANCY

Strategic judgment

CHRO-level expertise
Retainer model

AI HR APP

Operational scale

24/7 access
Automation + self-service

KEY FINDING

These solutions are complementary rather than direct substitutes. The strongest opportunity is to combine Consultancy + AI—using human expertise for complex HR decisions and AI for repetitive, accessible, and scalable HR support.

Enable Consulting	Est. 2013 12 yrs	SMEs 20–200 staff, high-growth startups, regional	Tiered per-employee packages + EDG grant offset	~ HRIS advisory only, no app	x	~ Partial (ops & compliance)	x Ops-focused only	✓ Strong — DTPM certified	Hundreds of SG SMEs (no named clients — discretion)	We add strategic + AI layer on top of their ops-heavy compliance model
Execup	Est. 2020 5 yrs	Cross-industry SMEs, mid-market	Project-based, no public pricing	x No AI or app	x	~ Partial (advisory & compliance)	x Not positioned this way	~ Basic compliance audits	Cross-industry SMEs (no named clients published)	We have AI SaaS + ChatBox + all 9 domains they can't match
U Ventures	Est. ~2019 ~6 yrs	Small businesses & startups, Singapore	Not publicly disclosed	x No AI or app	x	~ Partial (basic HR ops)	x Not positioned this way	x Not a focus	Small businesses & startups (no named clients)	We offer CHRO-level thinking + AI ChatBox they don't have
★ OUR FIRM Boulevard Cosmos	Est. 2026 Founding stage	SMEs 5–150 staff, startups seed–Series B, market entrants	SaaS subscription + consulting tiers (outcome-based)	✓✓ Native AI + ChatBox (iOS & Android)	✓✓ ChatBox — policy Q&A, leave, onboarding	✓✓ All 9 end-to-end (consultancy + app)	✓ Fractional CHRO as core offer	✓✓ AI compliance tracker + guardrails	Founding clients — to be built & announced	★ Only firm with native AI SaaS + consultancy + fractional CHRO

Our edge: Only we combine native AI SaaS + employee ChatBox + fractional CHRO + all 9 HR domains — at a founding team of 5.

COMPETITIVE MATRIX

HR SaaS Platforms — Playboy · Talenox · Swingvy · JustLogin · HReasily

• HR Consulting • HR SaaS Platform ★ OUR FIRM

COMPANY	Est. Years	Target Client	Pricing Model	PSG Approved	AI / HR App	Employee Chatbot	HR Consulting	MOM & PDPA	Named Clients	Our Edge vs. Them
Playboy	Est. 2016 9 yrs	SMEs — F&B, retail, hospitality, startups	From S\$5/emp/mo Free plan available	✓ PSG pre-approved	~ Basic automation no AI chatbot	x	x Software only	✓ CPF, IR8A, SDL built-in	F&B & retail SMEs across SG (no named clients)	We add HR advisory + fractional CHRO + AI ChatBox — they're ops-only
Talenox	Est. 2014 11 yrs	Very small teams just starting (free plan)	Free starter Paid plans for growing teams	✓ PSG pre-approved	x No AI features	x	x Software only	✓ SG-first compliance focus	Startups & small businesses SG + SEA (no named clients)	We add consulting, fractional CHRO + AI ChatBox on top of their SaaS
Swingvy	Est. 2014 11 yrs	Lean SEA startups, from 1 employee, 8 countries	From S\$5/emp/mo Free trial available	✓ PSG pre-approved	~ Mobile app, limited AI automation	x	x Software only	✓ CPF, IRAS, SG statutory	SEA startups & scale-ups, 8 countries (no named clients)	We add SG-focused HR consultancy + all 11 domains + AI ChatBox
JustLogin	Est. 2003 22 yrs	Small teams, modular pricing, Singapore	Modular — pay per module as needed	✓ PSG pre-approved	~ AI-driven recruitment only	x	x Software only	✓ CPF, IRAS, MOM-compliant 22+ yrs	Serves SG businesses for 22+ yrs across all sectors	22 yrs SaaS but zero human advisory or AI chatbot — we have both
HReasily	Est. 2015 10 yrs	Small to mid SMEs across ASEAN	Affordable per-employee monthly SaaS	~ Partial approval	~ Basic automation mobile-first	x	x Software only	✓ ASEAN compliance coverage	ASEAN SMEs in 7 countries (SG, MY, HK, ID, TH, PH, KH)	ASEAN reach but no HR consulting or CHRO — we combine all three
★ OUR FIRM Boulevard Cosmos	Est. 2026 Founding stage	SMEs 5–150 staff, startups seed–Series B, market entrants	SaaS subscription + consulting tiers (bundled)	✓ Pursuing PSG listing	✓✓ Native AI + ChatBox (iOS & Android)	✓✓ ChatBox — policy Q&A, leave, onboarding	✓✓ Full HR consultancy + fractional CHRO	✓✓ AI compliance tracker + guardrails	Founding clients — to be built & announced	★ Only solution combining SaaS + HR consultancy + AI ChatBox

Our edge: Every SaaS competitor is software-only. No platform includes HR consulting, fractional CHRO, or a policy-trained AI chatbot — that's our advantage.

Business Analysis – Competitors

Singapore's HR consulting and SaaS market is well-populated but deeply fragmented — no single competitor offers what Boulevard Cosmos does. The five consulting firms (DecodeHR, Align Group, Enable Consulting, Execup, U Ventures) all bring human expertise but zero native technology.

DecodeHR's dCHR.tech is a third-party tool portal, not a product, and none of them have an employee-facing chatbot or AI compliance automation. Pricing ranges from S\$2,000 – S\$8,000/month for retainers with no transparency, making budgeting difficult for SMEs.

The five SaaS platforms (Payboy, Talenox, Swingvy, JustLogin, HReasily) offer solid payroll and leave tools from S\$2–S\$8/employee/month and are PSG pre-approved but every single one is software only, with no HR consulting, no fractional CHRO, and no AI chatbot.

What they share across both categories is a critical gap: consulting firms can advise but not automate, and SaaS platforms can process but not think. Boulevard Cosmos is the only solution in Singapore that combines a native AI SaaS platform, an employee-facing ChatBox available 24/7, fractional CHRO-level strategic advisory, end-to-end coverage across all 11 HR domains, and proactive MOM/PDPA compliance alerts, at an outcome-based price point accessible to SMEs, and subsidisable by PSG grants that no consulting competitor can offer their clients.

We do not compete with consultants on expertise or with SaaS platforms on price — we make both comparisons irrelevant by being the only firm that delivers both.

SWOT ANALYSIS

SWOT ANALYSIS

Boulevard Cosmos — derived from the competitive matrix

HELPFUL

✓ STRENGTHS

- Only SG firm combining AI SaaS + employee ChatBox + fractional CHRO in one offering in the SME level
- Native iOS & Android ChatBox — 24/7 policy Q&A, leave & KPI and performance cycles
- Full 9 HR domain coverage — the only competitor to offer end-to-end consultancy + platform
- Lean & agile team — low overhead, fast decisions, SME-priced services

→ OPPORTUNITIES

- Over 60% of Singapore SMEs already outsource at least one HR function. The decision to outsource has already been made. We just need to be the best option.
Source: SIG Outsourced HR Report 2025 · sigsg.com | YesPay Singapore 2025 · yespaygroup.com
- Zero competitor has an employee-facing AI chatbot — the gap is wide open right now
- EDG & PSG grants available — accreditation will make our services government-subsidised
- AI adoption accelerating — early mover advantage in AI-powered HR is a short window

HARMFUL

⚠ WEAKNESSES

- Newly established in 2026 — zero client history vs. competitors with 12–22 years
- No named clients yet — harder to win trust without a public track record
- Not yet PSG pre-approved — competitors already subsidised by government grants
- Small team capacity — cannot serve many clients simultaneously at launch

⚡ THREATS

- DecodeHR has dcHR.tech — they could build a ChatBox and close the AI gap quickly
- Payboy, Talenox & JustLogin are PSG pre-approved — clients already subsidised without us
- Established firms have 12–22 years of client relationships we must overcome
- If we don't hit the market soon enough, well-funded competitors may replicate our model before we scale

Our 10 Target Clients

Two segments — AI-native & tech-forward companies + lean creative & retail SMEs

SEGMENT 1 — AI-Native & Tech-Forward Companies				
1	ProfilePrint	11–50	2017 - 9 yrs	AI / Food-Tech SaaS
2	Jublia	11–50	2013 · 13 yrs (→ Jublia AI 2026)	Event Tech / B2B SaaS
3	EntSecure	2–10	2020 · 6 yrs	Cybersecurity / Identity & Security
4	Holistics	51–200	2015 · 11 yrs	Data / Business Intelligence SaaS
5	Finmo	51–200	2021 · 5 yrs	FinTech / Treasury Technology
SEGMENT 2 — Creative & Retail SMEs				
6	XVXII By Vidhi	15–30	2020 · 6 yrs	Artisan Jewellery Retail
7	Solace Studios	80–150	2022 · 4 yrs	Photo Studio (20 outlets)
8	Klarra	12	2024	Women's Fashion (6 markets)
9	Aww Media	15–30	N/A	Creative Production Agency
10	Kasra Design	10–20	N/A	Animation / Design Studio

SWOT Analysis — All 10 Clients

From Boulevard Cosmos' perspective — what these clients mean for us as a combined portfolio

S STRENGTHS

- All 10 have already articulated their own HR pain — zero cold education needed
- ProfilePrint, Jublia and Holistics are AI-native or data-driven — fastest adopters in the portfolio
- Creative SMEs (XVXII, Aww Media, Kasra) have no legacy systems — ChatBox becomes their first and only HR tool
- EntSecure and Finmo are compliance-heavy sectors — proactive AI alerts are an immediate, concrete value add
- Lack of AI and HR systems causes friction

W WEAKNESSES

- Solace Studios may already have HR tools in place — switching cost and inertia applies
- Finmo and Holistics are in competitive sectors where enterprise HR vendors are also pitching
- Tech-forward clients (Jublia, ProfilePrint) will expect deep AI product maturity before they commit. These clients would only look for HR AI models that has been around at least 3-5 years, trust would be harder to build

O OPPORTUNITIES

- PSG grant subsidises our platform for all SME clients by up to 50% — removes the #1 price objection
- All 6 tech clients have named AI HR assistant and employee self-service as future needs — we are ready now
- No competitor in Singapore combines AI SaaS + fractional CHRO + ChatBox — we are the only complete answer
- EntSecure's PDPA-first mindset and Holistics' data governance focus make compliance features an instant sell
- Creative SME referral network — one satisfied client in this space creates 3–5 warm introductions organically
- For SaaS, allow clients to have a 30-day trial. This allows them to test out the product but also in turn allows us to understand client and user behaviour accordingly.

T THREATS

- Payboy and Talenox are PSG pre-approved and already pitching the SME segment — Tenor might be an issue
- Jublia and ProfilePrint may build internal HR tooling rather than buy — both have strong engineering teams
- Finmo and Holistics are in budget scrutiny so HR and AI SaaS may not be their priority spending
- Smallest clients (Aww Media, Kasra, EntSecure) have low deal value — high acquisition effort for low lifetime value. They may continue manually (no proper structure and tools) indefinitely — adoption is a real threat

BUSINESS ANALYSIS

Business Analysis — Why These 10 Clients

What they lack, where we step in, and why we win

WHAT THEY LACK

• No formal HR infrastructure

XXVII, Aww Media, Kasra Design and EntSecure have 2–30 staff managed on WhatsApp and spreadsheets. No onboarding system, no leave tracker, no policy documents employees can access.

• No AI-powered HR tool

All 10 companies have identified AI HR assistant, employee self-service and automated onboarding as future needs — but none has a native AI platform in place today. ChatBox fills this gap directly.

• No strategic HR leadership

Fast-growing tech companies (ProfilePrint, Finmo, Holistics, Jublia) are building people functions from scratch with no CHRO-level thinking. They need strategy, not just software.

• Compliance blind spots

Finmo, Holistics and EntSecure operate in regulated sectors where MOM, PDPA and sector-specific compliance obligations are daily risks. None has automated compliance tracking in place.

• HR cost too high for team size

Solace Studios, Love Bonito and the creative SMEs cannot justify a full HR hire. They need enterprise-quality HR at a startup-affordable price point.

HOW WE STEP IN

- ① ChatBox becomes the first formal HR system for the 4 smallest clients — PSG grant removes all price friction
- ② Our AI HR platform answers employee questions, automates onboarding and tracks compliance with event-driven and periodic checks across all 10 clients
- ③ Fractional CHRO positions us as a strategic partner for the 6 tech-forward companies building their people function
- ④ MOM & PDPA compliance alerts solve the single most urgent pain for regulated sector clients (Finmo, Holistics, EntSecure)
- ⑤ Our warm network intro (creative industry) opens the door for XXVII, Aww Media and Kasra Design

WHY WE WIN WITH THESE CLIENTS

- ✓ All 10 have already named their own HR pain — no education needed, only a solution
- ✓ ProfilePrint and Jublia are AI-native — they'll adopt fastest and advocate loudest
- ✓ Solace Studios (20 outlets) is a high-volume use case that prove scalability
- ✓ PSG grant subsidises adoption for the smaller clients — cost objection eliminated before it arises
- ✓ No competitor combines AI platform + ChatBox + fractional CHRO — we are the only answer that fits all 10
